Here you can find decoders for all versions of IonCube Code Encoder. I need to programatically decode an encrypted php code stored on a web server. IonCube is an obfuscator for PHP code. It consists of two parts: 1. Encoder (turns your code into an obfuscated function) 2. Decoder (turns the obfuscated function back into an original php code) You can think of the encoder part as an obfuscator and the decoder as an un-obfuscator. No Membership selected.
