About This Game

Sequel to the critically acclaimed, squad-based/real-time tactical combat game, Full Spectrum Warrior: Ten Hammers delivers the most authentic and realistic infantry combat experience ever. As Squad Leader, coordinate the actions of multiple infantry squads, leading them through over 12 levels of intense action. Utilize authentic combat tactics to command your squad as you battle enemies with an explosive arsenal of weapons, high-tech military equipment and new controllable mechanized units. New advanced squad controls give you more in-depth tactical command over your squad as you lead them through a variety of realistic combat missions. With all new multiplayer modes, go online and team up with a friend in two player co-op or go head-to-head with up to eight players through a variety of new adversarial and team-based objective missions.

- **Innovative gaming experience** - Combines intense squad based combat and real-time tactical action, delivering the most authentic and realistic infantry combat experience ever.

-
- **New Squad Controls** - Independently controllable scout & buddy teams, ability to give orders to one team while controlling another, and ability to enter buildings and position sniper teams.
 - **Advanced reactive enemy AI** that reacts realistically to combat situations.
 - **Expansive, non-linear level design** with multiple pathways to accomplish objectives.
 - **New Multiplayer Experience** - Full Spectrum Warrior style gameplay with both Co-op and Adversarial (Coalition vs. Opfor) online multiplayer modes.

Old, but a great strategic shooter... takes alot of coordination and replaying... I burned my PS2 out playing this game, it was one of the only games that I had to keep trying and trying at, but never got sick of! If you want some intense strategy and thinking, wiht coordinating teams and such through hostile urban environments, your gonna love this game.... awesome game. makes you think several moves ahead. very unforgiving if you make a mistake , which is what this type of game needs. worth every penny i paid.. Ah the memories. It's a very good tactical squad based game. You command 2-3 squads depending on the missions. The goal is to point fire, suppress, flank, and eliminate the enemies. It's hard but worth it. Strategic and fun. This is not for casuals or kids. This game offers improvement over the first but some of the classic features are should have returned. It is still a pretty fun tactical game. It's a third-person squad based game. The story is pretty good, telling the lives and stories of each soldiers. It's pretty sad but it makes you feel the characters. The game is intense, fun and full of strategies. Though there are times when enemies are unforgiven and spawn behind you, especially on the hardest difficulty. Can be annoying and frustrating but it's a fun overall game. I just wish they can make a third in the series, despite all the characters had "moved on". Still would love to see this kind of gameplay! Fantastic game, 9.5/10! Play it!!!!!!!. Don't play this game if you have anger management issues.

Good game though.. Please note: The game works really well with a controller

This game is like the original but you have a whole new team, you still have Mendez but now there is a new sgt. There are a few add ons. You can have your rifleman and TL sharpshoot to hit an enemy behind cover. With your m4V203 you can aim it by selecting him and holding R. And with your SAW you can hold R and lay down suppression on a certain enemy with just that one man. What else is nice too is you can split your team into "buddy teams" or teams of two, you can take one squad adn make the G and R go together and have your TL and SAW go together. This is a nice addon for flanking and getting close for a frag. You can also control Bradleys which is nice because you can use it for cover and taking out enemy cover. You can also use the cannon and the MG to supress enemies or take out technicals. What else is nice is that you can have two members of your squads taken out and still play on unlike the original where only one can be taken out. Play 1v2 against friends friends dont know how to play the game they send one squad out in the open (they are playing as US) i send one guy to flank them kills the entire squad

10/10 would flank again. This game would have been quite fun if it actually was working, but it isnt all that great, it's a bit annoying because if you lose one team member you have lost and must start all over again, game is old as hell, and you can't use modern resolution, if it wasn't for the resolution problem, I would recommend the game, cus it is fun to play if you actually manage to play it, but that is no guaratie, as for now, save your 1 dollar or whatever it cost now cus it isn't worth it, they should not be selling old games like this on Steam not playable on modern computers., it's a friggin scam, don't even bother trying to play the previous game, I could not even start it cus the screen was flickering all over the place, had to reboot my computer to get out of it. I will ask for a refund.. Full Spectrum Warrior Ten Hammers, the Sequeul of Full Spectrum Warrior is quite epic.

its a bit hard at some points, but fun and chelleging at others.

i played this game and it's Sequel a long time ago, it was memory that i was able to get back.

this get is quite amazing. I have played many hours of this game on the original Xbox. It was good back then and still is today. The gameplay is still unique. It's high paced tactical and strategic gameplay.

Would really like to play it, but at one point in the tutorial there's a spot where enemies spawn nonstop and start running into your position, even running past you. Maybe I didn't take the path the game wants me to go and should have both teams in the next courtyard already, I don't know.

What's worse is though that if one of your soldiers gets hit the slow motion does not end...dunno if that's just in the tutorial mission or the whole game because I did not progress any further.

I loved the first Full Spectrum Warrior but apparently this one's not for me.. Well, I just wanna say that this game is a bit of nostalgia to me, so I may be biased. :V

With that said, I can say I really like this game, even thou it sometimes makes me wanna throw myself outta tall buildings, yet still, you won't find better on this concept. It gives you somewhat good look at guerila wars today with huge changes from the first Full Spectrum Warrior. What the first game lacked, the second brings. Soldiers are sometimes acting stupid, but you just have to slowly learn, trust me. I would still wait a while to buy it on sale, in case the game is not for you.. I played the first game (for xbox/360) and loved the simple command system that allowed you to pull off complex orders and plans. Ten Hammers takes away some of the simplicity of the original with new and complex mechanics that are a bit hard to get the hang of but once you do it makes the game better than the first. The abuility to make a 4 man fire team into 2 two man teams replaces bounding from the first game, you are now able to aim individual soldiers wepons in order to eliminate priority targets as well as the addition of breaching and clearing buildings. I will recomened this game to any person who enjoys tactical/squad based stratagy games although I do recomened that you watch all the battle logs/tutorial videos and us a game pad.. Got this game up on the original Xbox. It was a gem of a game that I spent countless hours upon just on the campaign alone. Bought it again on the pc, and mowed through the campaign multiple times again for the sake of ol' times. The game has its pros and cons but what got me hooked is the solid gameplay mechanics of its squad command.

7/10

. Best game in Tactical Puzzle genre.. I'm writing this with a word of WARNING - profiles can get corrupted at random. It happened to me, couldn't make myself start over from the beginning for the third time. The same bug exists in the xbox version. Besides this game-breaking bug it is truly a diamond in the rough, like most games by R.I.P Pandemic. Full Spectrum Warrior Ten Hammers, the Sequeul of Full Spectrum Warrior is quite epic.

its a bit hard at some points, but fun and chelleging at others.

i played this game and it's Sequel a long time ago, it was memory that i was able to get back.

this get is quite amazing. Dated it might be, but this game is definately worth a look. A fun, challenging, and quite honestly, punishing tactical game. You control a few different 4 man squads (squads can also be broken up into 2 man buddy teams essentially creating mini squads) and sometimes a vehicle or other special unit. The story and story dialogue is a little cheesy, but I honestly don't care. The gameplay is great and the combat dialogue is surprisingly responsive to what is actually going on. You task your soldiers with breaching rooms, moving to corners, taking cover, laying down suppressing fire, throwing grenades, covering a sector, etc. Even on easy difficulty the game is very unforgiving and can be challenging, especially when you're just starting out. Send your troops charging into the room recklessly? They're gonna get dropped by a bunch of AK-toting sand-dwellers. Have good ol' sarge run out from the corner into the street? He's gonna catch a tank shell in the face. Decide to jump out from behind cover and say boo? All your guys are gonna die. Or if there's an enemy with an rpg in a window and you decide it's not worth moving your squad from behind your lovely flowerbox, you're going to have to casevac an entire squad. Basically if you don't play it smart in this game, you will lose. It is challenging game and requires the use of real tactics. Have your LMG trooper lay down suppressing fire so you can move your second team into a flanking position. Lay down smoke so you can enter a building to get an angle on the enemies in cover. You get the idea. Great game, well worth the price.
